Office Action Summary

Art Unit: 1761

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8, drawn to a method for wrapping a food product, classified in class 426, subclass 410.
- II. Claims 9-12, drawn to a wrapped food product, classified in class 426, subclass 106.

Inventions I and II are related as a process of making a product and the product made. The process as claimed in Group I can be used to make a product other than that recited in Group II. For example, the process as recited in Group I could just have the wrapper enclose the edible product without the two complementary parts of the edible product being held together by the wrapper as recited in Group II. That is, whether the parts are held together is a matter of degree of the tightness of the wrapper. Also, the parts could be held together by small portions of edible adhesive. Also, the product as claimed in Group II could be made by a process other than that recited in Group I; e.g., the use of shrink wrapping.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art requiring separate searches as shown by their different classification, restriction is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
